## **Fall Production Management Workshops**

### **VBP+, Calf-Club Model, Financing Options for Beef Producers, Pasture and Stored Forage COP, Regional Veterinarian Update and Branded Beef Programs**

Creating opportunities to put more dollars in cattle producers' jeans is priority #1 for the New Brunswick Cattle Producers Association. As we have done over the past several years, a series of management workshops are being presented prior to NBCP regional meetings specifically to support producer profitability.

The 2019 workshop series has been designed to prepare producers for accessing premium markets that are available or under development. For example: The Certified Island Beef program is still eligible for New Brunswick born calves, Verified Beef Production Plus certified calves are eligible for premiums through the feedlot and Calf-Club programs are being established in various locations throughout the Maritimes to provide new calf marketing opportunities.

Further to accessing market premiums, 2019 workshops include a strong focus on understanding and managing the cow-calf farm cost of production, with specific emphasis on the forage and pasture component of the cost structure. To round out the conversation, your local veterinarian will be on hand to discuss building and maintaining a functional herd health program that will help your cattle shine at auction.

Please see the detail below for dates, times and locations for the Pre-Meeting Workshops and NBCP Regional Meetings, which will follow. Note that in order to accommodate our guest speakers, several Districts have been combined to host these events, but the election of Regional Directors will be completed, as necessary, for each of the 8 Districts that make up the New Brunswick Cattle Producers Board of Directors.

**There will be a presentation by CFIA, in the evening NBCP Regional Meeting, regarding the Health of Animals Regulations Transportation of Animals Amendment which comes into effect February 20, 2020 to discuss new requirements for producers, dealers and abattoir owners.**

*For more information or to register for this event please call Brenda at 506-458-8534 or email [financemanager@bovinsnbcattle.ca](mailto:financemanager@bovinsnbcattle.ca)*

# Regional Meeting Schedule

## 1. Region 4 – Gloucester & Northumberland Counties

### **2019 Cattle Handling Initiative**

Application deadline for the 2019 Cattle Handling Initiative is Oct. 31, 2019, with a claim deadline of Dec. 6, 2019.

**Requirements for Eligibility (A veterinarian visit must occur and the producer must provide all five requirements for eligibility):**

1. Provide Equipment Cost Quotations, and,
2. Producers must have submitted their annual Producer Registration Form, and,
3. Provide copy of invoice for on-site veterinarian visit to discuss Herd Health Protocol and Cattle Handling Review, and,
4. Provide copy of Herd Health Protocol signed by veterinarian, and,
5. Provide copy of 2019 Cattle Handling System Review and Upgrade Strategy Form signed by veterinarian

#### **Assistance levels**

Approved applicants are eligible for financial assistance of 50% towards the purchase of animal handling facilities and/or weighing systems. The maximum assistance is \$3,000 per farm. Due to limited funding only a limited number of handling facilities and/or weighing system projects can be approved. Project approval will be considered on a first come-first served basis until funding has been exhausted.

### **Herd Health Fact Sheet**

In consultation with Dr. Lisa Freeze, DAAF, Fredericton, we have put together a Herd Health Fact Sheet, which is attached. This is intended as a basic guideline for best management practices. Investing in your beef cattle's health for the best performance potential and maximum return on your investment. A herd health management plan is essential for profitable beef production. All herd health plans are not created equally.

It is important that you talk to your veterinarian to develop a customized plan for your herd.
