

COST OF PRODUCTION WORKSHOPS

Based on significant feedback from members regarding tight margins that growers are experiencing in their cow-calf enterprise, the New Brunswick Cattle Producers will be delivering a series of workshops to support the development of a cost of production model for individual farms.

A series of two- short, interactive workshops will be held, the first in January with a follow up in March to help growers develop their own cost of production using their own numbers. Workshop presenters will offer one-on-one support and help growers to identify opportunities to decrease expenses, maximize revenues and boost overall profitability. The workshop series is designed to be applicable to the largest and smallest operators, regardless of your financial management skillset, so whether you need base learning or a refresher, this workshop is for you!

VBP+ TRAINING

Learn about the VBP+ program, it's benefits, the audit process, and the Certified Sustainable Beef Framework. Once the training is complete, you can work towards an audit OR simply keep things in mind for best practices to take to your farm operation without pursuing an audit.
